PROFESSIONAL SUMMARY

Junior Full Stack Developer currently studying for a BSc in Computer Science & Cyber Security at Aston University while holding a Level 5 Diploma in Full Stack Software Development from Code Institute.

Experienced building and deploying real-world software products using TypeScript, JavaScript, Python, React, Next.js, Django, PostgreSQL and Supabase. Developed CardMetric UK, a full-stack market pricing platform, a commercial competitor price scraping application for Shopify retailers, and multiple client websites.

Previously self-employed for over 11 years, bringing strong communication, stakeholder management, problem-solving and self-directed working skills. Seeking a Junior Software Developer position where I can contribute to production systems while continuing to develop technically within an experienced engineering team.

TECHNICAL SKILLS

Languages

JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frameworks & Libraries

React, Next.js, Django, Tailwind CSS, Bootstrap

Databases

PostgreSQL, Supabase, MySQL, MongoDB

Tools & Platforms

Git, GitHub, Vercel, Stripe, REST APIs, eBay Developer API, VS Code

Development Practices

Agile, Scrum, Responsive Design, Testing, Version Control, API Integration

PROJECTS

CardMetric UK

Full-stack web application providing UK Pokémon card pricing, collection management and market analysis tools.

Key Features

- Collection and portfolio management
- Historical market pricing snapshots

- Watchlists and market tracking
- eBay Browse API integration
- Affiliate revenue integration
- SEO optimisation and structured data
- Responsive dashboard and collection analytics

Technologies

Next.js, React, TypeScript, Supabase, Tailwind CSS, REST APIs

Sole Purpose Competitor Price Scraper

Commercial desktop application developed for a footwear retailer to automate competitor pricing analysis across Shopify stores.

Key Features

- Automated competitor product scraping
- Intelligent product matching using RapidFuzz
- Matrixify-compatible Shopify imports
- CSV export and reporting tools
- Desktop user interface designed for non-technical users

Technologies

Python, Pandas, RapidFuzz, Tkinter

G1M Gardening

Commercial website developed for a local gardening business with a focus on lead generation and customer enquiries.

Key Features

- Interactive lawn size estimator
- Postcode lookup functionality
- Map-based area measurement
- Mobile-first responsive design
- Email enquiry capture and lead generation

Technologies

Next.js, TypeScript, Tailwind CSS, Mapbox, Vercel

Advent Adventure Hackathon

Collaborative hackathon project developed as part of a multi-person Agile team.

Contributions

- Scrum Master responsibilities
- Sprint planning and coordination
- Supporting less experienced team members

- API integration and frontend development

Technologies

JavaScript, Tailwind CSS, Node.js

EDUCATION

BSc Computer Science & Cyber Security (In Progress)

Aston University

Current studies include:

- Object-Oriented Programming
- Software Engineering
- Cyber Security
- Data Structures & Algorithms
- Discrete Mathematics

Level 5 Diploma in Full Stack Software Development

Code Institute

Credit Rated by the University of the West of Scotland

Modules included:

- Full Stack Web Development
- Python Programming
- Django Development
- Databases
- Agile Development Practices
- Software Testing

PROFESSIONAL EXPERIENCE

Self-Employed Barber

November 2016 – Present

- Built and managed a successful customer-facing business serving a large repeat client base
- Developed strong communication and requirement-gathering skills through daily client consultations
- Managed scheduling, finances, stock control and business operations independently
- Built long-term customer relationships through consistent service delivery and professionalism

Information Technology Engineer

Equinox, Tewkesbury February 2022 – August 2022

- Diagnosed and repaired hardware faults across laptops, desktops and monitors
- Performed structured testing to verify system stability and performance
- Reduced repeat faults through thorough validation and quality assurance processes
- Delivered technical support and troubleshooting across multiple device types

Eco Advisor

Worcester Bosch March 2015 – November 2016

- Maintained customer and technical records using CRM systems
- Investigated reported issues and gathered technical information for engineers
- Coordinated service workflows and appointment scheduling

Eco Advisor

Npower October 2013 – March 2015

- Assessed customer eligibility against ECO scheme criteria
- Managed customer records and scheduling systems
- Communicated technical information clearly to customers and colleagues

ADDITIONAL INFORMATION

- Currently developing software products and commercial client websites outside of employment
- Volunteer with Lions Barber Collective providing free haircuts and mental health support
- Regular participant in hackathons and continuous professional development
- Comfortable working independently and within Agile development teams
